

UCI Nursing Science Ph.D. Information Session

Thursday, October 20, 2016
Thursday, November 3, 2016

252 Berk Hall
Starts at 4:00 pm

Built on a translational science interdisciplinary model, the doctoral program is supported by an interdisciplinary group of faculty from across the Irvine campus. The program promotes the development of scientific and theoretical expertise that contributes to scholarly endeavors in four key areas: Health Promotion and Disease Prevention, Health Disparities and Diversity, Disease and Symptom Management, and Health Services and Health Policy.

Key highlights include:

- Financial support through fellowships, stipends, teaching assistantships, campus scholarships, and more!
- One-on-one faculty mentorship to develop research interests
- B.S./M.S. to Ph.D Tracks
